

# CLT 2019 User Survey Report

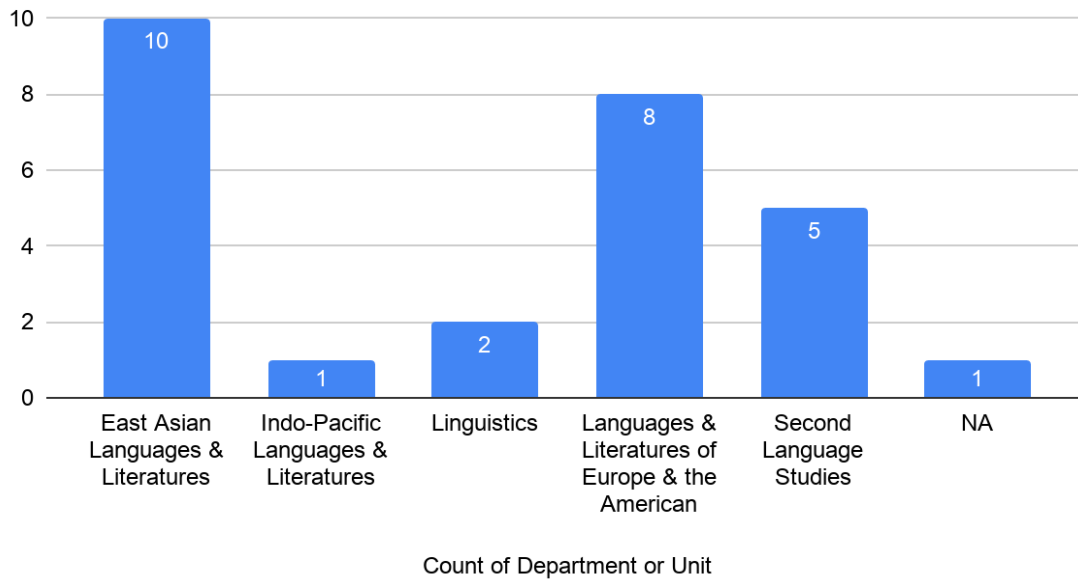

Compiled by Wenyi Ling

## Participants (27)

## Department

## What is your disciplinary area? (include language if applicable)

## 1. In the past two years, have you adopted a new technology to carry out any of the following? Please check all that apply.

## 2. Please specify any new technologies you have recently adopted and what purpose they serve.

### Responses:

Camcorder

Avant Language Assessment

Google forms to send out student surveys

Xoom for guest lecture delivery, much more Youtube

Google forms, WhenIsGood scheduling polls, Google docs, spreadsheets, shared drives, Dropbox

More use of Google tools

none in particular

tried google site, which is still confusing although Russ helped somewhat

CES Online course evaluations

In our SPAN 201 class we had an oral assessment in which students recorded their work on Audacity in the computer lab. Also we used VR headsets so that students can experience other places in Latin America from the classroom. This semester we used EdPuzzle to have students watch and listen to a video and answer questions.

I started teaching online classes, so it's mostly on Laulima.

Zoom--very useful for distance teaching, especially being able to use the breakout options to put students in small groups

Software to create infographics. I have used the VR carton glasses also couple of times.

Kahoot for checking students' understanding

evaluation of online exercises

I would like to know the most recent and frequently used instructional technology used in most language classrooms. I don't know much about instructional technology.

CES

Laulima, using computer lab for phonetics exercises

Skype meeting

### 3. What are the most significant factors that affect your use of technology?

### 4. If cost is a factor, please briefly explain what technology you wish you had access to.

**Responses:**

Portable projector

Slot machines

Blackboard

Projector and a computer in every classroom on campus, although I know this is out of the CLT's jurisdiction.

The VR headsets I borrowed from another teacher. I would like to have that available to all teachers when requested (as equipment rental).

I would like access to creative software such as Adobe Creative Suite.

Better LMS than Laulima

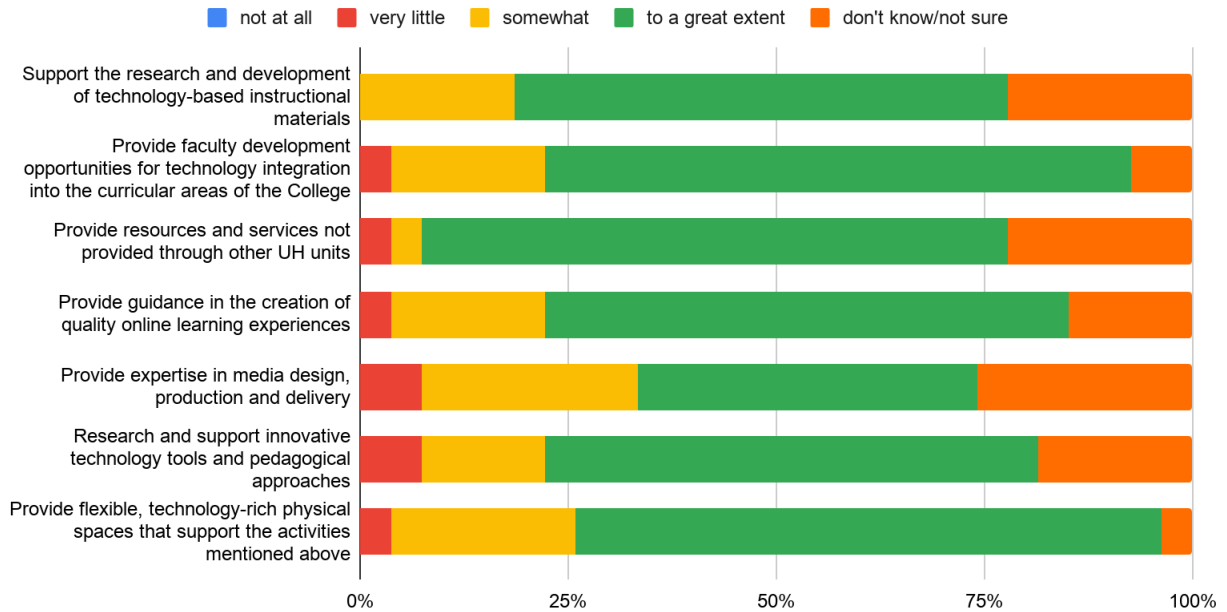

Arcgis

Google sites

SPSS

Some video editing software

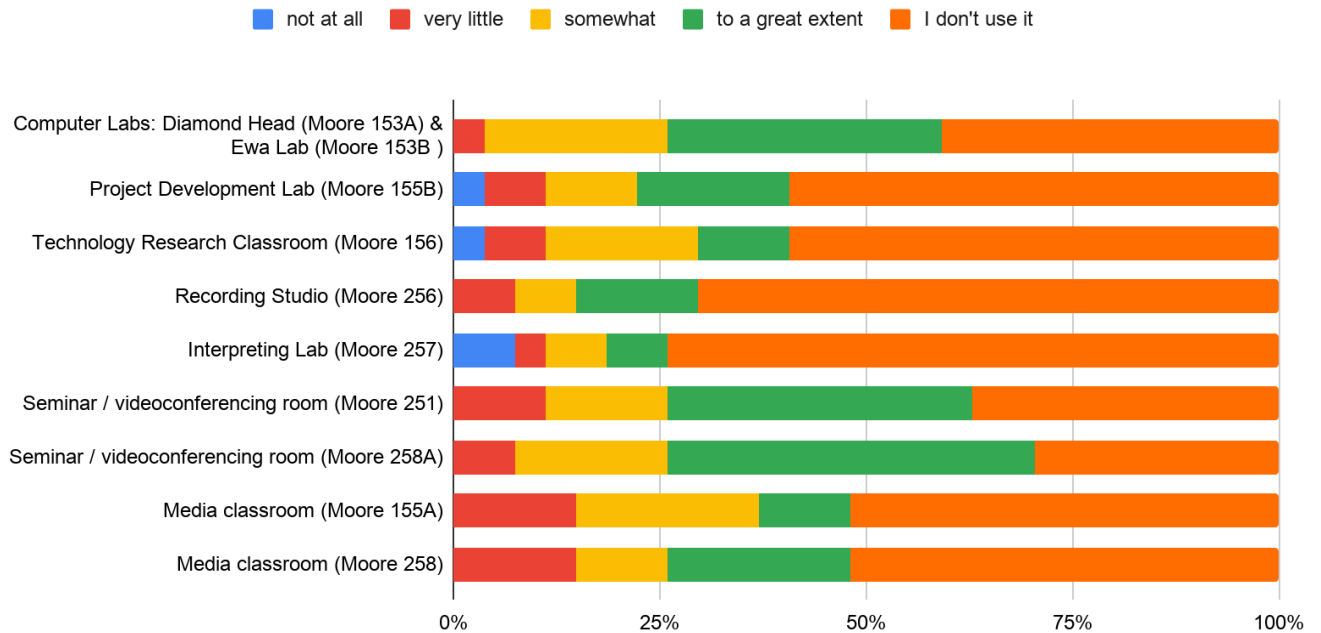

### 5. In your opinion, to what extent does the CLT fulfill the following aspects of its mission?

### 6. Indicate your level of agreement or disagreement with the following statements:

## 7. Please indicate the extent to which each of the following CLT facilities meets your needs.

## 8. How would you prioritize the need for the following services?

## 9. Are there specific resources that you wish the CLT should provide to students or instructors?

### Responses:

Pedagogical support for LLL classes that are not language classes

a variety of platforms for students-instructor interaction

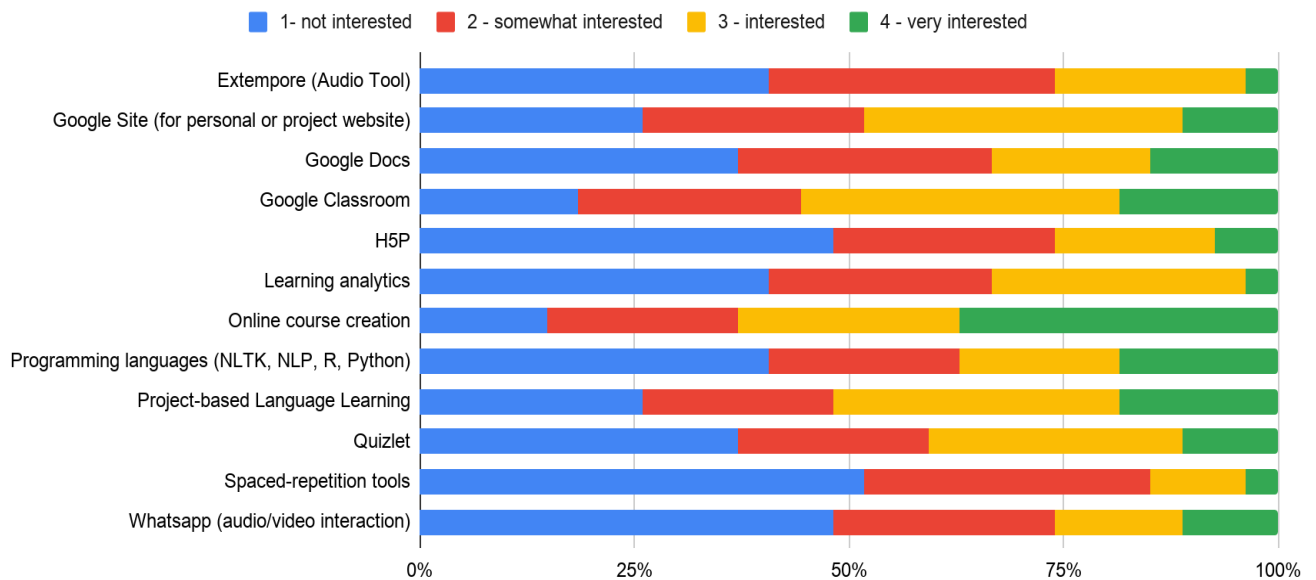

a testing center would be terrific

Spaces for more conducting cooperative technology-mediated work. Spaces with tables that move and configure differently for students to work with technology and to conduct research into language learning practices during group work (mics/video recorders on tables). Inviting spaces for faculty to meet and develop projects.

LMS other than Lulima (such as Canvas)

Training in video production, arcgis

## 10. What is your level of interest in learning more about the following?

## 11. What do you like about the CLT?

### Responses:

Range of media and devices we can use, and a friendly atmosphere

Personnel

Very supportive

Staff, website

Its availability to support my colleagues who teach languages

Great people with creative solutions and impressive support!

the supportive and friendly members

I am relatively new but I like how CLT includes me in news and developments, and I appreciate my personal interactions with members of the team!

Various tech support and helpful tech specialists

Nearby

I enjoy the orientations or seminars that you can earn badges. I learned a lot and it was very useful.

I like the classes that they provide.

Friendly, helpful staff who are always available to support faculty and answer questions

The staff is very approachable and helpful

A lot of different workshops or events for language teachers. I wish I could participate in more CLT events but due to time constraints, it was not easy.

Welcoming atmosphere

Video Conferencing room, computer labs when my class works on a writing assignment, presentation room

Very reliable and responsive

Technology support and some interesting projects

## 12. What do you think the CLT should change/improve on?

### Responses:

Reaching out to people, collaborate with departments for projects (not entirely sure)

Nothing

A lot of space, but some of it could be used better

Expand beyond the focus on language instruction

I hope you can continue all that you do. Things are working well.

Keep up the great work

Help faculty individual technology needs after they attend CLT's training series

More support for problems / questions about tech issues in Moore classrooms (rather than referring us to CIS)

I would benefit substantially from a seminar where the end product is a completed class design.

I would like more attention on how to optimize Lulima rather than focusing on Google sites. I've noticed that my online students can barely manage one platform, let alone two or three.

soundproofing between 258a and 258 (very hard to do a serious video conference in 258a when there's a class playing bongo drums in 258) and reduction of the echo in 251

Nothing more to be desired.

Offer specific training for faculty and students in sequence

I wish CLT could support us maintaining and updating our department website

Maybe CLT could cooperate with each department to hold an introductory session for the student orientation each year

### 13. What is the optimal time for you to attend CLT presentations and workshops?

### 14. Have you participated in any of the following CLT events?
